

Polystone® P HG EHS

PP

High-performance polypropylene especially for the Healthcare industry

In addition to its good hot steam sterilizability, this special material has good machinability and excellent chemical resistance. Polystone® P HG EHS is an isotactic, highly heat-stabilized polypropylene that is available as a homopolymer. This unique property profile makes it perfect for components for respiratory equipment or for applications in the pharmaceutical industry, either as a distribution unit, components for drug production or in chromatography.

Operating in the following industries

Extended characteristics

Sterilization resistance

After 200 cycles of heating steam sterilization at 134°C, 10 minutes, 3.1 bar chamber pressure, it shows no change in mechanical properties or color.

High flexibility

A wide range of colours and dimensions are available. Please contact us directly – we will be happy to answer your questions.

Good machinability

Polystone® P HG can be processed very well within narrow tolerances using conventional CNC machines. The material is also dimensionally stable.

Biocompatibility

Tested on the semi-finished product and approved in accordance with ISO 10993-5 and/or USP Class VI. Further test series are available on request.

Quality Management

The highest level of quality and performance in products, processes, the safety and health of our employees and the careful use of resources.
